

# **MATERIAL SAFETY DATA SHEET**

## **Rechargeable Li-ion Battery**

## Model: 603040 1400mAh 3.7V 5.18Wh

Prepared by	Approved by
Qiuting Zhong	Xingqun Zhang
Date: Jan. 1 , 2016	Date: Jan. 1, 2016

Page 1 of 10

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO.,LTD. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it --- File No./Rev.: SP-MSDS-0006F06

## **Material Safety Data Sheet**

#### **Section 1-Chemical Product and Company Identification**

#### **Product Identification**

#### Lithium-Ion Cylindrical battery

Norminal Voltage	:	3.7V			
Equivalent Lithium content	:	5.18Wh			
Testing Period	:	Jan. 01, 2016	То	Jan. 01,	2016

#### Manufacturer

Springpower Technology (SHENZHEN)Co.,Ltd

Xinhu Industrial Zone, Maan Town, HuiCheng District, Huizhou, Guangdong, China

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO.,LTD. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it --- File No./Rev.: SP-MSDS-0006F06

Section 3-Hazards Identification			
Preparation	Not dangerous with normal use. Do not dismantle, open or shred Li-ion Battery.		
hazards and	Exposure to the ingredients contained within or their ingredients products could be harmful.		
classification			
Appearance,	Solid object with no odor, no color.		
Color, and Odor			
Primary	These chemicals are contained in a sealed stainless steel enclosure. Risk of exposure occurs		
Route(s) of	only if the cell is mechanically, thermally or electrically abused to the point of		
Exposure	compromising the enclosure. If this occurs, exposure to the electrolyte solution contained		
	within can occur by Inhalation, Ingestion, Eye contact and Skin contact.		
Potential	ACUTE (short term): see Section 8 for exposure controls In the event that this battery has		
Health	been ruptured, the electrolyte solution contained within the battery would be corrosive and		
Effects:	fects: can cause burns.		
	Inhalation: Inhalation of materials from a sealed battery is not an expected route of exposure. Vapors or mists from a ruptured battery may cause respiratory irritation.		
	Ingestion: Swallowing of materials from a sealed battery is not an expected route of		
	exposure. Swallowing the contents of an open battery can cause serious chemical burns of mouth, esophagus, and gastrointestinal tract.		
	Skin: Contact between the battery and skin will not cause any harm. Skin contact with		
	contents of an open battery can cause severe irritation or burns to the skin.		
	Eye: Contact between the battery and the eye will not cause any harm. Eye contact with		
	contents of an open battery can cause severe irritation or burns to the eye.		
	CHRONIC (long term): see Section 11 for additional toxicological data		
Medical	Not applicable		
Conditions			
Aggravated	1001 003 (SHEN2, 10) 003 (SHEN2, 10) 003		
by			
Exposure	Sa Shilleds * Caller		
Reported as	Not applicable		
carcinogen			

### **Section 4-First-aid Measures**

#### Page 3 of 10

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO.,LTD. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it ---- File No./Rev.: SP-MSDS-0006F06

Inhalation	If contents of an opened battery are inhaled, remove source of contamination or move victim to fresh air. Obtain medical advice.
Skin contact	If skin contact with contents of an open battery occurs, as quickly as possible remove contaminated clothing, shoes and leather goods. Immediately flush with lukewarm, gently flowing water for at least 30 minutes. If irritation or pain persists, seek medical attention. Completely decontaminate clothing, shoes and leather goods before reuse or discard.
Eye contact	If eye contact with contents of an open battery occurs, immediately flush the contaminated eye(s) with lukewarm, gently flowing water for at least 30 minutes while holding the eyelids open. Neutral saline solution may be used as soon as it is available. If necessary, continue flushing during transport to emergency care facility. Take care not to rinse contaminated water into the unaffected eye or onto face. Quickly transport victim to an emergency care facility.
Ingestion	If ingestion of contents of an open battery occurs, never give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. Have victim rinse mouth thoroughly with water. DO NOT INDUCE VOMITING. Have victim drink 60 to 240 mL (2-8 oz.) of water. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Have victim rinse mouth with water again. Quickly transport victim to an emergency care facility.

### Section 5-Fire Fighting Measures

Flammable	In the event that this battery has been ruptured, the electrolyte solution contain within the	
Properties	battery would be flammable. Like any sealed container, battery cells may rupture when	
	exposed to excessive heat; this could result in the release of flammable or corrosive	
	materials.	
Suitable	Use extinguishing media suitable for the materials that are burning.	
extinguishing		
Media		
Unsuitable	CLOREY (SHENZLO	
extinguishing	「「「「「「「「」」」	
Media		
	Not within the second s	
	Not available	
Explosion	Sensitivity to Mechanical Impact: This may result in rupture in extreme cases	
Data	Sensitivity to Static Discharge: Not Applicable	
Specific	Fires involving Li-ion Battery can be controlled with water. When water is used, however,	
Hazards	hydrogen gas may evolve. In a confined space, hydrogen gas can form an explosive mixture.	
arising from	In this situation, smothering agents are recommended to extinguish the fire	
the chemical

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO.,LTD. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it ---- File No./Rev.: SP-MSDS-0006F06

Protective	As for any fire, evacuate the area and fight the fire from a safe distance. Wear a		
Equipment	pressure-demand, self-contained breathing apparatus and full protective gear.		
and	Fight fire from a protected location or a safe distance. Use NIOSH/MSHA approved		
precautions	full-face self-contained breathing apparatus(SCBA) with full protective gear.		
for firefighters			
NFPA	Health: 0 Flammability: 0 Instability: 0		

Section o-Accidental Release incasures		
Personal Precautions, protective equipment, and	Restrict access to area until completion of	
emergency procedures	clean-up. Do not touch the spilled material. Wear	
	adequate personal protective equipment as	
	indicated in Section 8.	
Environmental Precautions	Prevent material from contaminating soil and	
	from entering sewers or waterways.	
Methods and materials for Containment	Stop the leak if safe to do so. Contain the spilled	
	liquid with dry sand or earth. Clean up spills	
	immediately.	
Methods and materials for cleaning up	Absorb spilled material with an inert absorbent (dry	
	sand or earth). Scoop contaminated absorbent into an	
	acceptable waste container.	
	Collect all contaminated absorbent and dispose of	
	according to directions in Section 13. Scrub the area	
	with detergent and water; collect all contaminated	
	wash water for proper disposal.	

### Section 6-Accidental Release Measures

### Section 7-Handling and Storage

#### Page 5 of 10

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO.,LTD. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it ---- File No./Rev.: SP-MSDS-0006F06

If the Li-ion Battery are subject to storage for such a		
long term as more than 3 months, it is recommended		
to recharge the Li-ion Battery periodically.		
3 months: -10 $^\circ\!\mathrm{C}$ ~+40 $^\circ\!\mathrm{C}$ , 45 to 85%RH And		
recommended at $0^{\circ}C \rightarrow 35^{\circ}C$ for long period storage.		
The capacity recovery rate in the delivery state (50%)		
capacity of fully charged) after storage is assumed to		
be 80% or more. The voltage for a long time storage		
shall be 3.7V~4.2V range.		
Do not storage Li-ion Battery haphazardly in a box or		
drawer where they may short-circuit each other or be		
short-circuited by other metal objects.		
Keep out of reach of children.		
Do not expose Li-ion Battery to heat or fire.		
Avoid storage in direct sunlight.		
Do not store together with oxidizing and acidic		
materials.		

<b>Section 8-Exposure Controls/Personal Protection</b>	
Engineering Controls	Use local exhaust ventilation or other engineering controls to control sources of dust, mist, fumes and vapor. Keep away from heat and open flame. Store in a cool, dry place.
Personal Protective Equipment	<ul> <li>Respiratory Protection: Not necessary under normal conditions.</li> <li>Skin and body Protection: Not necessary under normal conditions, Wear neoprene or nitrile rubber gloves if handling an open or leaking battery.</li> <li>Hand protection: Wear neoprene or natural rubber material gloves if handling an open or leaking battery.</li> <li>Eye Protection: Not necessary under normal conditions, Wear safety glasses if handling an open or leaking battery.</li> </ul>
Other Protective Equipment	Have a safety shower and eye wash fountain readily available in the immediate work area.
Hygiene Measures	Do not eat, drink, or smoke in work area. Maintain good housekeeping.

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO.,LTD. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it ---- File No./Rev.: SP-MSDS-0006F06

Section 9-Physical and Chemical Properties			
Physical	Form: Solid		
State	Color: Green		
	Odour: Monotony	Odour: Monotony	
Change in con	dition:		
pH, with indic	ation of the concentration	Not applicable	
Melting point/	freezing point	Not available.	
Boiling Point, range:	initial boiling point and Boiling	Not available.	
Flash Point		Not available.	
Upper/lower f	lammability or explosive limits	Not available.	
Vapor Pressure	e.	Not applicable	
Vapor Density	: (Air = 1)	Not applicable	
Density/relativ	ve density	Not available.	
Solubility in V	Vater:	Insoluble	
N-octanol/wat	er partition coefficient	Not available.	
Auto-ignition temperature		If possible remove cell(s)from fire fighting area. if heated above 130°C ,cell(s)can explode/ent. Cell is not flammable but internal organic material will burn if the cell is incinerated.	
Decomposition	n temperature	Not available.	
Odout thresho	ld	Not available.	
Evaporation ra	ite	Not available.	
Flammability	(soil, gas)	Not available.	
Viscosity		Not applicable

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO., LTD. makes no warranty, expressed or implied, with respect to this information and --- File No./Rev.: SP-MSDS-0006F06 disclaims all liabilities from reliance on it

### Section 10- Stability and Reactivity

Stability	The product is stable under normal conditions.
Conditions to Avoid (e.g. static discharge, shockor	Do not subject Li-ion Batteryto mechanical shock.
vibration)	Vibration encoutered during transportation does not
	cause leakage, fire or explosion.
	Do not disassemble, crush, short or install with
	incorrect polarity. Avoid mechanical or electrical
	abuse.
Incompatible Materials	Not Available
Hazardous Decomposition Products	This material may release toxic fumes if burned
	or exposed to fire
Possibility of Hazardous Reaction	Not Available

Section 11-Toxicological Information		
Irritation	Risk of irritation occurs only if the cell is mechanically, thermally or electrically abused to the point of compromising the enclosure. If this occurs, irritation to the skin, eyes and respiratory tract may occur.	
Sensitization	Not Available	
Neurological Effects	Not Available	
Teratoaenicity	Not Available	
Reproductive Toxicity	Not Available	
Mutagenicity (Genetic Effects)	Not Available	
Toxicologically Synergistic Materials	Not Available	

Section 12-Ecological Information	
General note:	Water hazard class 1(Self-assessment): slightly
	hazardous for water.
	Do not allow undiluted product or large quantities
	of it to reach ground water, water course or

	sewage system.
Anticipated behavior of a chemical product in environment/possible environmental	Not Available
impace / ecotoxicity	N / A / 111
Mobility in soil Persistence and Degradability	Not Available       Not Available
Bioaccumulation potential	Not Available
Other Adverse Effects	Not Available

### Section 13-Disposal Considerations

Product disposal recommendation: Observe local, state and federal laws and regulations. Packaging disposal recommendation: Be aware discarded batteries may cause fire, tape the battery terminals to insulate them. Don't disassembly the battery. Completely discharge containers (no tear drops, no powder rest, scraped carefully). Containers may be recycled or re-used. Observe local, state and federal laws and regulations. The potential effects on the environment and human health of the substances used in batteries and accumulations; the desirability of not disposing of waste batteries and accumulators as unsorted municipal waste and of participating in their separate collection so as to facilitate treatment and recycling.

### **Section 14-Transport Information**

This report applies to by sea, by air and by land;

The Li-ion Battery tested according to the requirements of the 5th revised edition of the UN manual of tests and Criteria, Part III, subsection 38.3;

Lithium ion battery was protected so as to prevent short circuits. This includes protection against contact with conductive materials within the same packaging that could lead to short circuit;

The LITHIUM ION BATTERY according to Section II of PACKING INSTRUCTION PI965- 967 of the 2016 IATA Dangerous Goods regulations 57th Edition may be transported and applicable U.S.DOT regulations for the safe transport of Li-ion Battery.

More information concerning shipping, testing, marking and packaging can be obtained from label master at http://www.labelmaster.com/.

The packaging shall be adequate to avoid mechanical damage during transport, handling and stacking. The materials and pack design shall be chosen so as to prevent the development of unintentional electrical conduction, corrosion of

the terminals and ingress of moisture.

The package must be handled with care and that a flammability hazard exists if the package is damaged; Each package must be labeled with a Li-ion Battery handling label or in addition to the Class 9 hazard label. With regard to

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. SPRINGPOWER TECHOLOGY SHENZHEN CO.,LTD. makes no warranty, expressed or implied, with respect to this information and disclaims all liabilities from reliance on it --- File No./Rev.: SP-MSDS-0006F06

transport, the following regulations are cited and considered:

- The International Civil Aviation Organization (ICAO) Technical Instructions.

- The International Air transport Association (IATA) Dangerous Goods Regulations. UN number of lithium battery: UN3480 or UN3481;

UN Proper shipping name/Description (technical name): Lithium ion batteries or Lithium ion batteries contained in equipment or Lithium ion batteries packed with equipment;

UN Classification (Transport hazard class): Non dangerous;

Marine pollutant (Y/N): N;

- The International Maritime Dangerous Goods (IMDG) Code.

For lithium-ion batteries by sea, provided that packaging is strong and prevent the products from short-circuit. UN number of lithium battery: UN3480 or UN3481;

UN Proper shipping name/Description (technical name): Lithium ion batteries or Lithium ion batteries contained in equipment or Lithium ion batteries packed with equipment;

UN Classification (Transport hazard class): Non dangerous; Marine pollutant (Y/N): Y;

Special Provision: International maritime dangerous goods code (IMDG) 188, 230, 310, 348, 957;

- The US Hazardous Materials Regulation (HMR) pursuant to a final rule issued by RSPA

- The Office of Hazardous Materials Safety within the US Department of Transportations' (DOT) Research and Special Programs Administration (RSPA)

#### **Section 15-Regulatory Information**

OSHA hazard communication standard (29 CFR 1910.1200)

V Non-hazardous

#### **Section 16-Other Information**

The information above is believed to be accurate and represents the best information currently available to us. However, concorde makes no warranty of merchantability or any other warranty, express or implied, with respect to such information, and we assume no liability resulting from its use. Users should make their own investigations to determine the suitability of the information for their particular purposes. Although reasonable precautions have been taken in the preparation of the data contained herein, it is offered solely for your information, consideration of investigation. This material safety data sheet provides guidelines for the safe handling and use of this product; it does not and cannot advise on all possible situations, therefore, your specific use of this product should be evaluated to determine if additional precautions are required. The data/information contained herein has been reviewed and approved for general release on the basis that this document contains no export controlled information.
